

Cardiology Wellness Center

2400 Patterson Street, Suite 218 Phone: 615.884.4425
Nashville, Tennessee 37203 Fax: 615.891-7961

Hal Roseman, MD, MPH, FACC

Dear Patient,

It is with enthusiasm that I welcome you to my preventive cardiology practice. I believe that my practice is distinguished by offering a personalized style of care that is reminiscent of earlier times when physicians spent time to get to know each patient in order to make personalized treatment plans.

As a preventive cardiologist, I am interested in reducing the risk and complications of cardiovascular problems. Expertise in the practice includes the diagnosis, treatment, and management of cardiovascular diseases, abnormal lipids or cholesterol, hypertension, obesity, insulin resistance, and diabetes. As a national medical lecturer, I am knowledgeable of the latest guidelines and therapies in the treatment of cardiovascular diseases. In treating you, I will approach clinical problems with these guidelines in mind. When necessary, I will consider other modalities, including integrative, complimentary health practices to address your health problems.

- **Statement of Purpose:** The role of my practice is to assist patients in fulfilling their health goals and full life attainment. I will try to assist my patients in modifying their high-risk behaviors so as to prevent heart attacks, stroke, kidney disease, diabetes and other related health problems and to minimize underlying factors that are known to be associated with the development and progression of cardiovascular disease.

- **Health questionnaire:** As a cardiologist for more than 20 years, I have developed a certain style of interacting with my patients that will lead hopefully to your enjoying better and healthier lives. In order to understand you as an individual, I am requesting that you spend a significant amount of time to complete the enclosed health questionnaire. Additionally, it would be quite valuable to review your past medical records. Please notify my office as to how to obtain your past medical records before your appointment.

- **Appointment Time Expectations:** Contrary to conventional practices, my staff and I will be spending a significant amount of time with you. We will do our best to accommodate your schedule. However, there are times when taking care of the urgent matters of patients may cause delays.

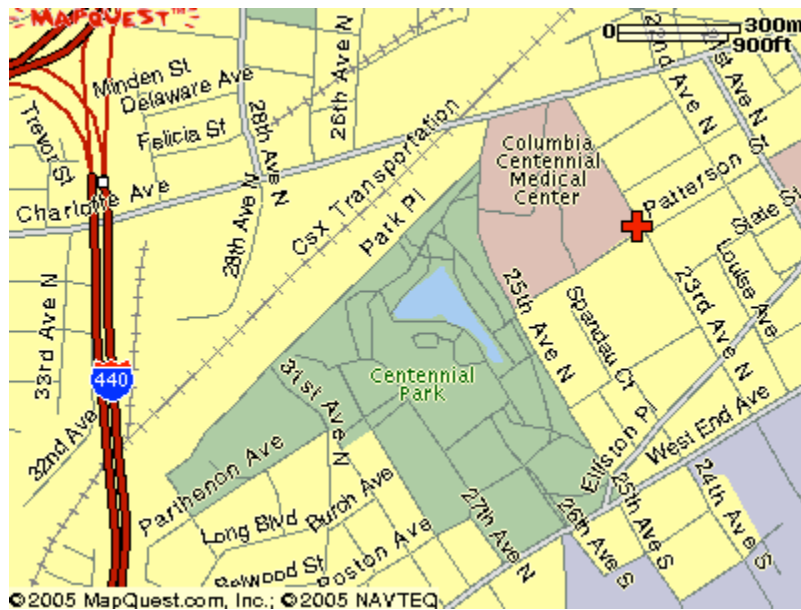

- **Appointment Follow-up Opportunities:** It is very difficult to cover completely a person's health in the limited time of a single office visit. I have set up an email system by which you can obtain specific information about subjects of importance to you. Please use the above email to voice your needs. If you do not have internet and email services, I will try to print out the material at the time of your visit.

- **Address and location of my practice.**

The address and phone numbers of my office is as follows:

2400 Patterson Avenue, Suite 218
Nashville, Tennessee 37203
Phone Number: (615) 884-4425
Fax: (615) 891-7961

A map to my office location is as follows:

The directions to my new office are included on the following website:
<http://www.centennialmedicalcenter.com/Map.asp>

My staff and I have always striven to offer ourselves in a genuine, caring, and compassionate manner to help the many that we have had the privilege to serve. Each patient is important to us. We look forward to getting to know you and being of service in assisting you in reaching your health goals.

Best of health,

Hal Roseman, MD, MPH, FACC, FACP

Biographical Data of Dr. Hal Roseman:

Dr. Hal Roseman has been trained in all phases of general cardiology, including nuclear and echocardiographic testing, pacemaker technology and implantation, and invasive and interventional treatments. However, his recent principal professional focus has been preventive cardiology.

Formal Education:

- Undergraduate education: University of Pennsylvania (Philadelphia, Pennsylvania)
- Medical School: University of Tennessee Center for Health Sciences (Memphis, Tennessee)
- Master Degree in Public Health (Epidemiology of Cardiovascular Diseases): Yale University School of Medicine (New Haven, Connecticut)

Clinical Training:

- Internship, Internal Medicine: Baptist Memorial Hospital, a University of Tennessee affiliate (Memphis, Tennessee)
- Residencies, Internal Medicine: US Public Health Service Hospital (Staten Island, New York) and Waterbury General Hospital, a Yale University hospital affiliate, (Waterbury, Connecticut)
- Fellowship, Cardiology: the Brown University hospital system (Providence, Rhode Island)
- Fellowship, Nuclear cardiology: Massachusetts General Hospital, a Harvard University affiliate (Boston, Massachusetts).

A frequent national lecturer, Dr. Roseman is a member of such professional societies as the American College of Nuclear Physicians, the Society of Nuclear Medicine, the Vascular Biology Work Group, and the American Diabetes Association. He is a standing Fellow of the American College of Chest Physicians, the American College of Physicians, and the American College of Cardiology. He is a diplomat of the National Lipid Association and is a specialty member of the American Society of Hypertension. He has served actively as an expert medical-legal witness and a forensic cardiologist in the area of malpractice and worker's compensation related to cardiovascular diseases.

Dr. Roseman founded the Cardiology Wellness Center as a consultative-based clinical practice directed to primary and secondary prevention of cardiovascular diseases, based upon enhancing endothelial function, by using evidence-based medicine and lifestyle modification.
